Profile

Computer engineer based in Mindelo, working across backend development, full-stack products, network infrastructure, and production operations. I build web platforms from problem analysis and system design through deployment, monitoring, and maintenance. Recent work includes a pharmacy-duty service for Cabo Verde, a multilingual forms platform for a dive centre, and school management APIs.

Professional Experience

ZoneTech

IT OPERATIONS

- Maintained and improved the IT and network infrastructure used in daily operations.
- Diagnosed hardware, software, and connectivity issues and implemented practical fixes.
- Deployed, configured, and supported internal systems and tools.

Mindelo, Cabo Verde

2024 – 2026

Pilar Vermelho

SUPERMARKET EMPLOYEE

- Replenished stock, managed the deli counter, and handled customer requests during daily shifts.
- Processed sales at the cash register using Primavera.

Mindelo, Cabo Verde

Apr. 2023 – Sep. 2023

Akira Corporation

SOFTWARE ENGINEER TRAINEE

- Built web application features and reusable components with React and Laravel.
- Used Docker to standardise local development and package applications for deployment.
- Used GitHub, Jira, and Slack to coordinate tasks and team delivery.

2022

Selected Projects

Nhafarma — Pharmacy Duty Platform

BACKEND ENGINEERING & OPERATIONS

- Built a Fastify and PostgreSQL service that turns Cabo Verde's monthly pharmacy-duty schedules into a searchable web application.
- Automated email attachment ingestion and PDF parsing with Python; added structured logs, health checks, rate limits, and Prometheus/Grafana monitoring.
- Migrated the production codebase from Express/Prisma to Fastify/Drizzle while preserving existing data.

2025

DiveTribe — Multilingual Forms Platform

FULL-STACK DEVELOPMENT

- Built a configurable, four-language form flow with Next.js and a containerised Laravel REST API.
- Generated PDFs from official templates and protected identity documents with private object storage, authenticated streaming, and expiring signed links.

Mindelo, Cabo Verde

2026

School Management Platform

BACKEND DEVELOPMENT

- Designed a Laravel API for role-aware school workflows, centralising authorization and record-visibility rules.
- Implemented direct S3 uploads, Redis-backed services, interactive API documentation, and feature tests around critical permissions.
